

## Setting New Standards in Electronic (ACH) Check Processing

Electracash, Inc is a leading provider of Internet payment processing services, including (ACH) check processing. We offer businesses the ability to accept eChecks in the US and Canada, and to make Direct Deposits around the globe, for both business and consumer transactions. "ACH" stands for "Automated Clearing House," a payment system designed to allow companies and consumers to reduce or eliminate the use of paper checks when making routine payments, and to act as an alternative to credit card payments.

ACH processing by Electracash offers increased revenue for companies and provides greater flexibility for customers, resulting in:

- Improved cash flow
- Reduced transaction costs
- Enhanced customer convenience

Electracash products give merchants of all sizes flexible and reliable payments solutions to grow their businesses. By offering supplementary payment solutions, merchants can better accommodate their customer's needs.

Electracash has been in the eCheck and Direct Deposit processing business since 1997, serving thousands of businesses and millions of consumers. Created from direct banking and payments experience as well as technical expertise, Electracash has integrated the best of these worlds to provide advanced transaction processing services.

With an excellent reputation in the electronic payments industry, Electracash processed nearly two million eCheck transactions in 2004, and continues to grow at an average rate of 100% per year.

### Save Time and Money!
